

SolarRoyal SolaVent Series

Don't Stay Passive Get Active!

The SolaVent makes any existing passive roof vents into solar powered active ventilation, whether a new install or retrofit to existing commercial and/or residential vents: dormer vents, box vents, ridge vents, commercial vents, gables and turbines. Easy installation with our patent pending two-piece design as well as providing reversible air-flow.

- No New Roof Penetrations Required
- Safe Installation (no climbing on roofs)
- Retrofit Any Existing Passive Vents
- Below Roof Deck Attachment
- No Modifications Required To Existing Vents
- Unaffected By Adverse Weather Conditions
- Reversible Airflow(intake or exhaust)
- No Bulky Mounted Equipment (HOA friendly)
- Will Not Void Roof Warranty
- No Roof leaks
- Re-roof Friendly
- Easy-3-Step Installation
- No 110V Electric Wiring Required
- Low \$ Investment (no cost to operate)

Any Existing
Passive Vents

Below Deck

- **Solar Panel:**
30Watt High-efficient monocrystalline.
